

THE LIABILITY CONTROL PLATFORM

Every liability. Visible and controlled.

One platform with two sides — a powerful **internal CRM & tracking system** for your team, and a reassuring **client app** for the businesses you protect.

Internal · team CRM

External · client app

One platform. Two sides. One source of truth.

INTERNAL

CRM & tracking

Your operations team & advisers

- ✓ Every client managed from one portfolio
- ✓ Track & progress every liability
- ✓ Run the Action Centre & casework
- ✓ Post status updates to clients
- ✓ Export board reports & evidence

SHARED
LIABILITY
RECORD

EXTERNAL

Client app

The business owners you protect

- ✓ See your live position at a glance
- ✓ Watch what your team is doing for you
- ✓ Approve what needs you
- ✓ Ask the AI assistant
- ✓ 24/7 human support

From fragmented and reactive — to recorded and in control

BEFORE TRADESHIELD

- Financial position spread across systems
- Deadlines chased rather than planned
- Historic numbers, no live status
- Incomplete adviser information
- Problems surface too late

WITH TRADESHIELD

- ✓ Every liability in one register
- ✓ Funding requirements visible in advance
- ✓ Named responsibility & approval
- ✓ Reconciled records & evidence
- ✓ Early escalation, current information

THE RESULT One operational picture: what is due, when, who is responsible, what is funded, and what must happen next.

HOW IT FITS TOGETHER

Data in. Control in the middle. Clarity out.

Live link — every action your team takes in the CRM appears instantly as a status update in the client's app.

INTERNAL · FOR YOUR TEAM

A CRM & tracking system built for liabilities

Run every client from one workspace — record, approve, fund, chase and reconcile, with a full audit trail on every obligation.

Client portfolio

Every client, their total liabilities, risk level and open actions — at a glance.

Liability tracking

Each obligation moves through its lifecycle with owner, due date, funding and evidence.

Action & casework

Approvals, documents, decisions and escalations routed to the right person.

Post client updates

Log what you've done — it appears live in the client's app.

Reports & evidence

Board report, liability export, funding report and evidence pack.

Alerts that matter

Overdue, unfunded, missing evidence — surfaced before they become problems.

Action Centre

Insights

Connect

Account

A calm, clear view of their own business

Plain-English status

“Action needed”, “Needs attention” or “On track” — with a one-line reason.

The numbers that matter

Total recorded, due in 7 days, overdue, and the projected funding gap.

What their team is doing

A live feed of the work you’re doing on their behalf.

Help, always on

An AI assistant plus 24/7 human support, one tap away.

THE CORE RECORD

Every liability, controlled end to end

One shared record — tracked by your team, visible to your client — moving through five clear stages.

Evidence, attached

HMRC notice, funding approval, bank reference and reconciliation note — time-stamped and linked to the record.

Full audit history

Who did what and when — created, approved, funded, paid — nothing lost, everything explainable.

Your clients see exactly what you're doing for them

Every action logged in the CRM becomes a status update in the client's app — support is visible, never a black box.

COMPLETED

Time to Pay arrangement secured with HMRC

IN PROGRESS

Restructuring the £400,000 trade finance facility

AWAITING CLIENT

Approve the VAT funding release

ON THE CASE

Disputed professional fee — recovery paused

Each update shows status, next step and the named specialist handling it.

An AI assistant and 24/7 human support

AI ASSISTANT

Answers from live data

- “What’s overdue?”
- “How much do I owe HMRC?”
- “What’s my funding gap?”
- “What is the team doing for me?”

24/7 SUPPORT

Real people, any time

- ✓ Live chat with an agent
- ✓ Request a callback
- ✓ Message your team directly
- ✓ Quick-answer help centre

CONNECTED

Liabilities sync straight from your ledgers

Xero & QuickBooks

Bills, tax and payroll read securely via OAuth.
TradeShield never moves your money.

Mapped automatically

Every bill lands in the register, categorised
across HMRC, People, Supply and Risk.

Always current

A live, categorised, reconciled position — no
manual re-keying.

Built for live data. The sync engine and data mapping are in place today — going live connects your Xero / QuickBooks credentials through a secure backend, with no rebuild.

THE REVOLUTION

From internal tool to commercial app

The same platform, taken to market in three clear phases.

01

LIVE TODAY

Internal CRM & client PWA

The full platform is built and working — your team's CRM plus an installable client app that runs on any phone or desktop.

02

NEXT

On the App Store

Wrap the same codebase with Capacitor and publish to Apple & Google. A packaging step, not a rebuild.

03

SCALE

Commercial SaaS

Secure multi-tenant logins, live accounting sync and Stripe subscription billing — sold to businesses and advisers.

COMMERCIAL MODEL Recurring SaaS subscription — per business, or per adviser portfolio — tiered by client count. Revenue from day one.

A control platform — not a substitute for judgement

No automatic discharge

Recording, allocating or approving a liability does not itself pay, settle or extinguish it.

Officer duties remain

The app does not remove statutory duties owed by company officers, or replace professional advice.

Scope is contractual

Which liabilities are managed is set by the signed agreement and onboarding scope.

Exceptions need action

Disputed, unverified or overdue items require evidence and a responsible decision.

THE OUTCOME

Know what is due.
Know what is funded.
Know what happens next.

One platform. Your team in control internally; your clients reassured externally
clear path to a commercial app.
